

APPARATUS TRUSTED REFERRALS

Handout

Apparatus Trusted Referrals

Get the additional help you need from Apparatus' network of professionals. We know what we're good at, and we know other service providers that can help you with the additional services you may need.

Our Apparatus Trusted Referrals are free to all Apparatus clients.

This service is best for any contracting company that is ready to fire on all cylinders!

Certified Public Accountant

We want only the best for our clients. If you're in need of a CPA for your end of year tax return filing or for financial consulting, we'll recommend the expert best suited to the needs of your contracting business.

Business Strategy

As your contracting business grows in size, scope, and scale, the issues you'll face will change. As your business becomes a substantial operator in your market, you'll need to begin considering more advanced tax strategies, more advanced asset protection strategies, and perhaps succession planning or advanced expansion strategies. Apparatus can support your aggressive growth by helping drive the engine of new leads and customers, but other advanced growth strategies will need new advisors. We'll work with you to find the advisory partners you need to help you achieve your goals!

Growth Strategy

Embarking on a sustainable growth strategy needs great tools and execution, but it also needs an overall framework and roadmap. Apparatus can provide you the tools and execution support to achieve your growth goals, but some of our clients need help with the development of a plan for which services, clients, and markets to pursue. If you need that help, we'll work with you to find a trusted advisor who can help you chart your path forward while we help you with the journey.

Start. Grow. Scale. Apparatus powers your back office™.
